

National Severe Weather Warning Service

Chief Forecasters Assessment

The vigorous depression will become slow-moving near the Northern Isles of Scotland. The associated frontal system will continue to edge southwards during early Tuesday bringing heavy rain to some western parts of Scotland on strong to gale force westerly winds.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **00:05 on Tue, 12th Aug 2014** until **06:00 on Tue, 12th Aug 2014**

Persistent and occasionally heavy rain will continue across parts of western Scotland through the early hours of Tuesday. The public should be aware of the risk of localised surface water flooding. The rain will be accompanied by strong to gale force westerly winds leading to difficult driving conditions and possible disruption to transport. The rain is expected to ease through Tuesday morning.
